

STONE SKIRT

VS **Brick**

Concrete Footer: **StoneSkirt** utilizes I-Beam technology which does not require the expense of a concrete footer.

Mortar Cracks: **StoneSkirt** is a mortarless concrete system. You will never have to worry about your mortar joints cracking with the age of the wall.

Installation Flexibility: **StoneSkirt** is a mortarless concrete system. You will never need to mix mortar at the job site which allows you to work in any weather condition.

Resale: **StoneSkirt** is considered masonry underpinning significantly increasing the resale value of the home.
