

STONE SKIRT

VS Vinyl

FIRE: *StoneSkirt* is made out of concrete and is non flammable. Vinyl will melt or burn when exposed to a flame.

High Wind: *StoneSkirt* is rated to handle winds in excess of 110mph. Vinyl extremely thin, can easily be damaged or detach in windy weather.

Color Flexibility: *StoneSkirt* can be painted if desired. Vinyl color cannot be change once it is installed

Resale: *StoneSkirt* is considered masonry underpinning significantly increasing the resale value of the home.
